Anurag Kar

U.S. Citizen | Registered Representative | Atlanta, GA | 929-374-7328 | anuragkar970@gmail.com | anuragkar.dev

Experience

Systematic Fixed Income Trader Apr 2025 – Present
BlackRock *Atlanta, GA*

- Executed over 130,000 trades ($106B notional) across U.S. Treasuries via Tradeweb, CAD Rates on Bloomberg, and IG Credit on Tradeweb/MarketAxess, managing $86B in automated flow and $20B in voice/RFQ execution
- Led IG portfolio collapse trading by matching batched PM orders against dealer axes and identifying opposing flow via internal Python tools, while diagnosing pricing outliers using bond structure, liquidity conditions, and market movement to confirm execution quality
- Engineered JavaScript order-routing logic in Aladdin covering the full order lifecycle (generation to execution), evaluating trading parameters and optimal market pathways for 121,000 automated trades
- Took ownership of automated order validation and execution controls, integrating them with outlier detection reporting to flag auto-eligible flow and prevent avoidable operational events
- Handled fast exception triage with PMs and ops to protect execution quality, and supported BES agency crosses as a Registered Representative (Series 7, 63)

Data Automation Intern May 2024 – August 2024
Smurfit Westrock *Atlanta, GA*

- Automated the metrics collection of over 10,000 network and VMware resources by leveraging the LogicMonitor API with recursive API calls, saving approximately 4 hours of manual spreadsheet entry each month
- Streamlined data extraction across more than 2,500 IBM, Linux, and Windows servers using parallelized SSH connections and regex for text processing, eliminating the need for manual work
- Implemented a GUI-based metrics data entry system using tkinter and pyodbc, incorporating validation techniques to ensure data accuracy before database insertion
- Built Power BI dashboards with SQL Server data to reflect changes in resource counts due to product end-of-life cycles, providing actionable insights for OKR evaluations
- Designed a proof of concept for AWS DevOps Guru with RDS for MySQL to evaluate the tool's monitoring and detection capabilities, using Python to simulate in excess of 500 concurrent users executing inefficient queries

Projects

F1 Data Analysis Bot | *Python, Google Cloud, Google Gemini*

- Developed and maintained a Python-based Discord bot that delivers real-time information and statistics about the Formula 1 (F1) championship to enthusiasts, ensuring dependable hosting and scalability on the Google Cloud Platform with deployment across 26 Discord servers
- Achieved significant outreach with bot-generated graphics, garnering over 760,000 views on social media, and was featured on a popular motorsports data analysis channel with over 1,000,000 subscribers

Technical Skills

Languages: Python, Java, SQL, HTML/CSS/JavaScript
Tools: Aladdin, Bloomberg, Tradeweb, MarketAxess, Excel, Power BI, GitHub, Firebase, AWS S3, AWS DevOps
Databases: MySQL, SQL Server, Sybase, MongoDB, AWS RDS
Frameworks/Libraries: Flask, Django, FastAPI, React, Next.js, Bootstrap

Education

New York Institute of Technology New York, NY
Bachelor of Science in Computer Science, 3.68 GPA *Sep 2021 - Dec 2024*
